OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
sockeye salmon	8-14-96	X		X	

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

Observed adult sockeye salmon in the unnamed stream on 8-14-96.
Photos were taken of the stream channel at the Horseshoe Lake road culvert outlet and the wetland complex upstream of the culvert inlet. According to a local resident, sockeye salmon are found in Orchid Lake (~1/4 mi. upstream) during Aug. & Sept. each year.
